

# JAY'J EATON

## ABOUT ME

Implementing my approach to fast learning as a Software Developer has allowed me to quickly learn new skills to solve problems. I love to learn and improve every day and I am always looking for ways to make my systems more efficient and reliable.

## EXPERIENCES

### PRICEMATES SOFTWARE ENGINEER

FEB 2022- CURRENT

- Learned the fundamentals of start-up culture and the differences from working in a large team.
- Built a complete project from start to production.
- Continue to advance my software skills every day.
- Learned to work and negotiate with contractors on expectations and results.

### VGW - GLOBAL POKER SOFTWARE ENGINEER

APR 2022- JULY 2023

- Completed the VGW full-stack engineer associate pathway in 5 months learning and utilising OOP/TDD best practices
- Completed AWS Solution architect associate.
- Contributed production code.
- Levelled up my fundamental skills with things such as Event-driven architecture and Test Driven Development.
- Learned how to build complex API systems in Kotlin/Ktor implementing best practices like Domain Driven Design
- Learned how to perform in a strong team following Shape Up.
- Continued to develop in my personal time on things like game design, and other software-related topics.
- Built a strong relationship with my coworkers and the product team allowing me to work efficiently.

### GENERAL ASSEMBLY SOFTWARE ENGINEERING IMMERSIVE

FEB 2022- APR 2022

- Immersive 13-week course in full stack development.
- Understanding the fundamentals of Software Development and debugging.
- Advanced my problem-solving skills by helping others with bugs and errors.

### SPEEDEFX 2017 - 2021 MANAGER/CONSULTANT

- Improved business functionality and processes to go from 400k pa to over 1m pa in less than 2 years.
- Put together a strong team for improved productivity and efficiency across the business.
- Allowed me to travel the world learning different business structures, strategies and cultures.
