ABOUT ME

Implementing my advanced problem solving skills in Software Development has allowed me to quickly learn new skills. This provides me the best opportunity to undertake complex problems in an organized way.

EXPERIENCES

GENERAL ASSEMBLY
SOFTWARE ENGINEERING IMMERSIVE

- Immersive 13 week course in fullstack development.
- Understanding the fundamentals of Software Development and error driven processes.
- Created a simple tic tac toe game utilizing dom manipulation with jQuery, html/css and javascript.
- Built a functioning crud app utilizing restful best practice methods along side ruby on rails and postgres.
- Advanced my problem solving skills by helping others with bugs and errors.
- my projects source code can be found on my Github and the links to working models are below.

TicTacToe   **CookBook**   **PetPals**

SPEEDEFX
MANAGER/CONSULTANT

- Improved business functionality and processes to go from 400k pa to over 1m pa in less than 2 years.
- Constructed a strong team for improved productivity and efficiency.
- Provided opportunities to help the community by running charity events for sick children.
- Allowed me to travel the world learning different business structures, strategies and cultures.

OBSESSIVE CREATIONS
OWNER

- Learnt the importance of structured work flow and efficiency.
